

Quick wilt resistant varieties of pepper

Consolation
Plant Variety

A. Balakrishnan
Wayanad, Kerala

Balakrishnan (59), an innovative farmer from Kerala, has developed two quick wilt resistant varieties of pepper. *Ashwati* and *Suvarna* pepper varieties were developed through crossing using the local varieties *Uthirankotta* and *Karimunda* as female parent respectively and *Cheruvally* as the male parent for both varieties.

Both these two varieties give higher dry pepper yield, are vigorous in growth and resistant to quick wilt.
