

Effective sound speaker system

Consolation
Electronics

Pakkyanathan
Perambalure, Tamil Nadu

Pakkyanathan, who has been running the business of renting music sound systems, observed that the existing sound speakers did not have the same quality that he wanted. To overcome these problems and achieve a dramatic sound effect, he designed a circular speaker assembly in stainless steel. The speakers are artfully presented in subtle curves and stunning finesse. They give better dramatic sound effect and desired strong bass for extra punch.

The innovator has secured his IP rights for the technology.
