

## Attachment on drill machine to gather metal chips

**Khushi Rajeshkumar Patel**  
Class 5, Chadarada Primary School  
Sabarkantha, Gujarat

While drilling iron, many a times, metal debris produced can enter eyes harming it. Khushi has suggested having a magnetic debris collector attachment on the drill so that the debris does not fly off and hurt the user's eye.

Young Khushi likes to read books, watch TV and make drawings. She wants to become an engineer and then a teacher when she grows up.
