**Problem addressed:** Termites can cause agricultural damage due to their voracious appetite for cellulose and, in other parts of the world, other materials. Termites can attack plants at any stage of development from the seed to the mature plant. Herbal composition of SRISTI Suraksha is very easy to apply to control termite.

**Product :**  
 Termite presence causes a great loss. Looking into the need of the wood protection covering both pre - and post construction, we have developed a 100% natural, organic and herbal composition that can be applied in industrial, commercial as well as domestic applications. The natural and safer termite killer also controls other wood damaging bugs. The termite control compositions are available in different packaging specifications, which can be customized to specific needs.
