

Diarrhoea Control

Diarrhoea is characterized by frequent liquid bowel movements. Acute diarrhoea is a common cause of death in cattle and other pet animals. The loss of fluids in diarrhoea causes severe dehydration, which is considered as the main reason behind death. We have developed 100% natural composition prepared from organic and pure herbs for combating the problem of diarrhoea in animals. The entire product development is done after extensive research and development activities. We offer the compositions at most competitive costs in different specifications.

Product Detail

Our Brand	Dia-Stop
Category	Veterinary
Formulation	Powder
What for	Herbal product to control diarrhoea
Pack size	320 gm
Application	80 gm twice a day with feed for 4 days
