

As part of the Multi-Location Turmeric Trials under the NBC–NIF (National Innovation Foundation -India) programme in Jammu & Kashmir and Maharashtra, participatory multi-location trials involving nine turmeric varieties have been successfully conducted in Khadergal village of Samba district, Jammu Province, Union Territory of Jammu & Kashmir, to assess their regional suitability.

The planting of all selected varieties has been completed successfully, and the crops are currently under systematic observation to evaluate their performance, adaptability, and yield potential under the prevailing local agro-climatic conditions.
