

The National Innovation Foundation–India (NIF) conducted a Capacity Building Workshop at Balaji Institute of Engineering & Science, Narsampet, Telangana, engaging more than 200 students from various engineering disciplines

.During the session, participants were introduced to the concept of grassroots innovations and their significance in addressing real-world challenges. They were also briefed on the incubation programmes offered by NIF-India to support the development and scaling of innovative ideas.

A key highlight of the workshop was an interactive discussion on internship opportunities at NIF-India, where students explored avenues to contribute to grassroots innovation through activities such as scouting, documentation, field engagement, and innovation management. The session encouraged young engineers to leverage their technical knowledge for creating meaningful social impact.

The enthusiastic participation and keen curiosity demonstrated by the students reflected a growing interest in innovation-driven nation-building
