<b>Problem addressed:</b> Premature shedding of flowers which is also known as premature abscission leads to tremendous losses to the farmer. This can happen to variety of reasons which also includes different kinds of stresses. SRISTI Prayas helps to retain the flowers till maturity and also acts as growth promoters for the plants.		
<b>Product :</b> This is a completely natural and 100% organic product, which is used to stop and further prevent the shedding of flowers from plants. These flower shedding antidote promote growth and control pest in vegetables, mango, banana, guava, jasmine, etc. They also contribute to produce denser flower. Without producing any side effect, the natural herbal composition contributes to higher production with minimum investment.		
<b>Key Competitive Advantage:</b>	<ul style="list-style-type: none"> <li>• Available at affordable price.</li> <li>• Easy to use.</li> <li>• No harmful effects on land.</li> </ul>
